- Massive Skylights
- Interior Glass Walls
- Luxurious Jet Tub
- Sculpted Staircase
- Sky and Tree Vistas
- Natural Landscaping
- Preserved Knoll Terrain

Condo One Tower Unit: unique, dramatic, compelling.

Interpreted with a new and interesting vision, this historically significant Tower Condo offers a contemporary lifestyle while respectfully preserving the unique, award winning design of its original conception. Contemporary use of surface materials, fixtures and appliances provide contrasting texture, look and feel to the rough hewn original wood. Black powder coated fabricated staircase, railings and wire glass windows create velvet textures and luminous surfaces for the complex play on light season to season.

Dining area with sliding glass windows.

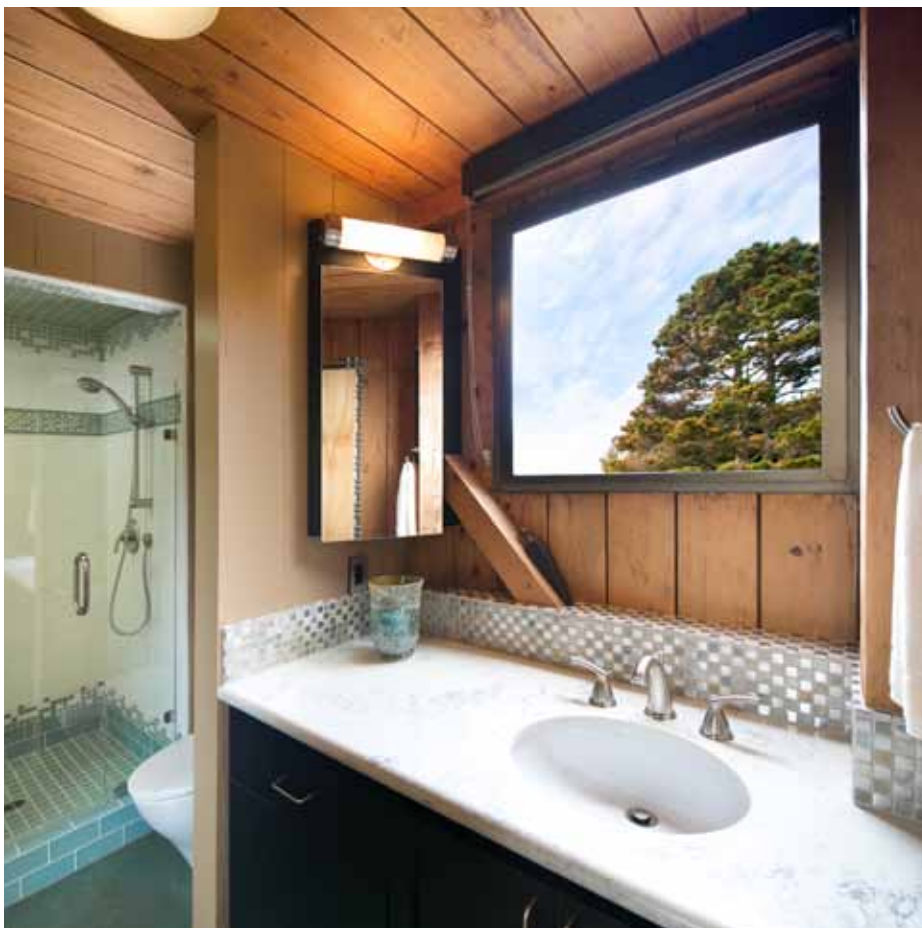

Two luxurious baths.

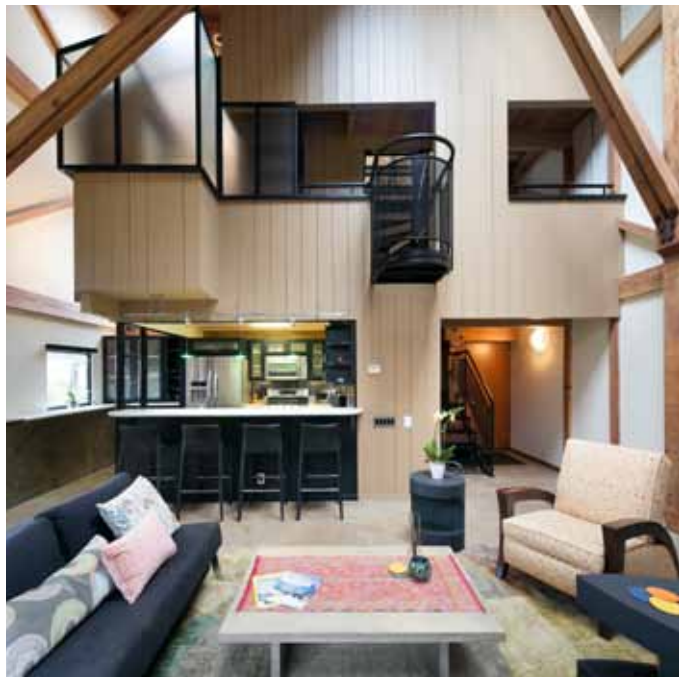

Intimate relationship between architecture and terrain.

The knoll that defines the bowl within which this condo is positioned provides an intimate relationship with nature at eye level from the ground floor. Equally compelling are the window framed treetops and sky from the third level. Brilliant internal light wells from skylights, internal and external windows contrasted with a large round perforated metal grid stairwell create a waterfall of light through all levels. The Juliette balcony overlooking the great room inspires whimsical improvisation in this creative, joyous home.

Historically Acclaimed

- 2 Bed 2 Bath 1 Car Port
- Three Levels
- No Shared Walls
- Radiant Floor Heat
- Custom Fabricated Stairs
- Wood Burning Stove
- Concrete, Tile, Carpet Flooring
- Smart Appliances
